

UNIVERSITY OF ILLINOIS CAMPUS AT URBANA-CHAMPAIGN

- | | | | | |
|---|--|---|------------------------------------|---|
| 1 Veterinary Research Laboratory | 13 University High School | 26 Observatory | 39 Men's Old Gymnasium and Annex | 53 Davenport House |
| 2 Women's Residence Hall | 14 Aeronautical Engineering Laboratory | 27 Morrow Plots | 40 Talbot Laboratory | 54 Civil Engineering Surveying Building |
| 3 McKinley Hospital | 15 Mining and Metallurgical Laboratory | 28 Mumford Hall | 41 Electrical Engineering Building | 55 Architecture Building |
| 4 Ceramics Building | 16 Transportation Building | 29 Agricultural Engineering Building | 42 Altgeld Hall | 56 Veterinary Pathology Laboratory |
| 5 Mechanical Engineering Building | 17 Physical Plant Service Building | 30 Dairy Manufactures Building | 43 Mathematics Building | 57 Veteran's Recreation Building |
| 6 University Club, Men's | 18 Mechanical Engineering Laboratory | 31 Woodshop and Foundry | 44 Administration Building | 58 Natural Resources Building |
| 7 Chemistry and Chemical Engineering Building | 19 Physics Building | 32 Machine Tool Laboratory | 45 Bevier Hall | 59 Illini Union Coffee House |
| 8 Busey and Evans Residence Halls for Women | 20 Natural History Building | 33 Electrical Engineering Research Laboratory and Annex | 46 Lincoln Hall | 60 Band Building |
| 9 Woman's Gymnasium | 21 Harker Hall | 34 Fire Station | 47 Gregory Hall | 61 Ice Skating Rink |
| 10 Vegetable Crops Building | 22 Noyes Chemical Laboratory | 35 Engineering Hall | 48 Library | 62 Armory |
| 11 Floriculture Building | 23 Chemistry Annex | 36 Illini Union Building | 49 David Kinley Hall | 63 George Huff Gymnasium |
| 12 Illini Village | 24 Davenport Hall | 37 Auditorium | 50 Vivarium | 64 Men's Residence Hall |
| | 25 Smith Memorial Music Hall | 38 Stock Judging Pavilion | 51 Arcade Building | 65 Parade Ground Housing Units |
| | | | 52 Illini Hall | 66 Stadium |

ON THE CAMPUS

ADMINISTRATION BUILDING (44) — Offices of the President, the Provost, the Dean of the Graduate College, the Comptroller, the Dean of Students and Dean of Men, the Physical Plant Department, the Department of Admissions and Records, the Purchasing Agent, the University Press, and the Office of Public Information.

AERONAUTICS RESEARCH LABORATORY (14) — Center of research in aeronautical engineering.

AGRICULTURAL ENGINEERING BUILDING (29) — Headquarters for the study of farm machinery, buildings, soil and water conservation, and rural electrification.

ALTGELD HALL (42) — Fine example of Romanesque architecture, named for John P. Altgeld, an Illinois governor instrumental in the University's development. Houses the College of Law. There is a carillon in Altgeld Hall tower that chimes the quarter hours and plays frequent concerts. Between Altgeld and Administration is the grave of John Milton Gregory, the University's first President. The inscription on the gravestone: "If you would see his monument, look about you!"

ARCADE BUILDING (51) — Upstairs in this building is the Visual Aids Service, which every year lends out thousands of motion pictures and slides to schools and organizations throughout the State. Behind this building, on Sixth Street, are the offices of the Institute of Labor and Industrial Relations.

ARCHITECTURE BUILDING (55) — Headquarters of the College of Fine and Applied Arts, and the Departments of Art and Architecture. Downstairs in the building are two exhibit halls for paintings, sculptures, prints, and architectural drawings.

ARMORY (62) — Headquarters for Military, Naval, and Air Science. The drill hall is 200 by 400 feet. There is an indoor rifle range, an indoor running track, and room for baseball practice indoors.

AUDITORIUM (37) — For University lectures, concerts, and large meetings. Seats 2200. Has a four-manual organ.

BAND BUILDING (60) — Houses Illinois' world-famous band.

BEVIER HALL (45) — Named for Isabel Bevier, a pioneer staff member in Home Economics, this center for women's activities on the campus houses the Dean of Women, the Department of Home Economics, and a women's swimming pool and gymnasium.

BUSEY AND EVANS RESIDENCE HALLS FOR WOMEN (8) — Dormitories for 380 women.

CERAMICS BUILDING (4) — Headquarters of the Department of Ceramic Engineering, and center of work in clay manufactures, glass, tile, terra cotta, etc.

CHEMISTRY ANNEX (23)

CHEMISTRY AND CHEMICAL ENGINEERING BUILDING (7) — These buildings, and part of the adjoining Noyes Laboratory, house the University's famous Department of Chemistry, which has to its credit many important discoveries, and which has more graduate students than any other chemistry department in the world.

CIVIL ENGINEERING SURVEYING BUILDING (54) — Now used for work in art and design.

DAIRY MANUFACTURES BUILDING (30) — Center of work in testing and processing milk products.

DAVENPORT HALL (24) — Named for a distinguished Dean of Agriculture, Eugene Davenport, this hall is headquarters, among other things, for the work in Agronomy, Animal Nutrition, and Dairy Production, and the Regional Soybean Laboratory.

ELECTRICAL ENGINEERING BUILDING (41)

ELECTRICAL ENGINEERING RESEARCH LABORATORY AND ANNEX (33) — These buildings house the Department of Electrical Engineering and many research laboratories where problems of electronics, light, and power are studied. Included is one of the few vacuum tube research laboratories outside commercial plants.

ENGINEERING HALL (35) — Offices of the College of Engineering and of the Department of Civil Engineering.

FIRE STATION (34) — Serves also as demonstration center for the Firemen's Short Courses.

FLORICULTURE BUILDING (11) — Where problems of growing flowers are studied. People come many miles to see the annual chrysanthemum show.

GREGORY HALL (47) — Named after the first President of the University, this building houses the College of Education, the School of Journalism, the Department of Psychology, and the University's non-commercial radio stations, WILL and WIUC-FM.

HARKER HALL (21) — Oldest building on the campus. Erected in 1878 as a Chemistry laboratory, later housed the College of Law, now used for biological sciences.

HUFF GYMNASIUM (63) — Named after the famous director of athletics, George Huff. Contains the offices of the School of Physical Education, the Department of Physical Education for Men, the Director of Athletics, and the coaches. Here Illinois plays its intercollegiate home basketball games. With the aid of temporary bleachers seats 7000 fans.

ICE SKATING RINK (61) — This building, a gift to the University, has a skating floor 125 by 200 feet, and a balcony seating 1200 spectators. Now it is doing temporary service as a men's dormitory.

ILLINI HALL (52) — Once the Student Union, now houses the Division of University Extension, *The Daily Illini* and *The Illio* (student annual), and speech research.

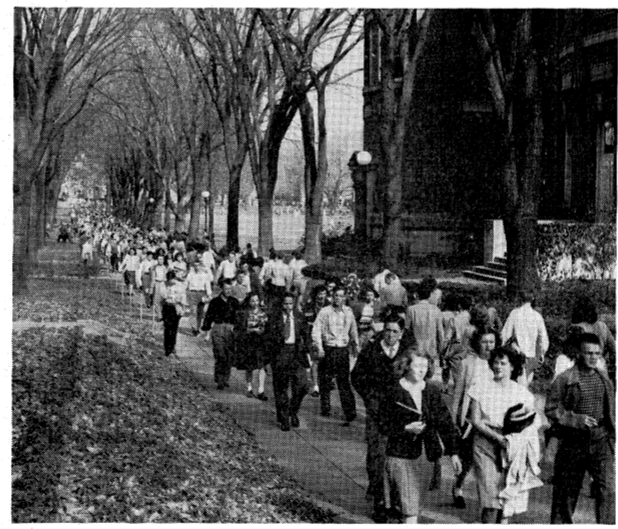

ILLINI UNION BUILDING (36) — This beautiful building is the University's "front door" and "community center." Among its services to students and visitors are lounges, reading rooms, bowling, billiards and other recreation, a ballroom, many meeting rooms, a cafeteria, several dining rooms, and a few rooms for overnight guests.

ILLINI UNION COFFEE HOUSE (59) — Erected to meet some of the problems of feeding the University's greatly increased postwar enrollment.

ILLINI VILLAGE (12) — This temporary housing project for married students provides for 269 families.

KINLEY HALL (49) — The College of Commerce and Business Administration occupies this building, which was named after President David Kinley.

LIBRARY (48) — Largest state university library, third largest among universities, and seventh largest among all the libraries of the world. Contains 2,500,000 items.

The Broadwalk on the Urbana-Champaign Campus

LINCOLN HALL (46) — Named after the man who, in his younger years, tried law cases in Urbana and once ran a foot race down Urbana streets; and who, as President of the United States, signed into law the Land Grant Act which made possible the establishment of universities like Illinois. Headquarters of the College of Liberal Arts and Sciences, and of most of its language and literature and social science departments. A Museum of European and Asiatic Culture is on the fourth floor of this building, and a Little Theater, seating 750, on the first floor.

MACHINE TOOL LABORATORY (32) — Here engineering students learn machine shop practice and operation.

MATHEMATICS BUILDING (43) — Built as a wing of Altgeld Hall, this houses the Mathematics Department.

McKINLEY HOSPITAL (3) — Has private rooms and wards for 80 patients and can accommodate more in an emergency. A 47-bed addition provides isolation for patients with contagious diseases.

MECHANICAL ENGINEERING BUILDING (5)

MECHANICAL ENGINEERING LABORATORY (18) — Laboratories, classrooms, and offices of the Department of Mechanical Engineering, including work in power generation and transmission, machine design, construction, and operation, heating, ventilating, and air conditioning. The principles of ventilation used in the Holland Tunnel were developed here, as were the new Smokless Furnace and other improvements in heating.

MEN'S OLD GYMNASIUM AND ANNEX (39) — Used with Huff Gymnasium for classes in Physical Education; the annex is doing emergency service as a dormitory for 300 men. North of the gymnasium is Illini Field, where stood the University's first building, and where many Illini teams have played baseball.

MEN'S RESIDENCE HALL (64) — Dormitory for 491 men.

MINING AND METALLURGICAL LABORATORY (15) — Contains kiln room, assaying laboratory, and other laboratories and classrooms for the study of metals and mining.

MORROW PLOTS (27) — America's oldest soil experiment fields, and the oldest corn experiment fields in the world. They have been in continuous cultivation since 1876, and are still teaching the lesson of proper soil use.

MUMFORD HALL (28) — Headquarters for the College of Agriculture and the Agricultural Experiment Station, and for the Departments of Horticulture, Animal Science, Agricultural Economics, and Landscape Architecture. Named after Dean Herbert Windsor Mumford for his work in agriculture and animal science.

MUMFORD HOUSE — Office of the Small Homes Council. Not shown on map; located southwest of Mumford Hall on Taft Drive.

NATURAL HISTORY BUILDING (20) — Occupied by the Departments of Botany, Geography, Geology, Physiology, and Zoology, and the Museum of Natural History.

NATURAL RESOURCES BUILDING (58) — Devoted to the work of the State Natural History Survey and the State Geological Survey.

NOYES CHEMICAL LABORATORY (22) — Many Chemistry laboratories and classrooms are now being moved to the newer Chemistry buildings, but many great discoveries have been made and many great chemists trained in this building. Named after the late William Albert Noyes, distinguished professor of chemistry.

OBSERVATORY (26) — Laboratory for Astronomy.

PARADE GROUND HOUSING UNITS (65) — 81 temporary buildings which house 1,307 single students. Across the street are 128 single-family temporary dwellings.

PHYSICAL PLANT SERVICE BUILDING (17) — Offices for several of the departments which have the job of operating and servicing the University's sixty million dollar physical plant. Beyond right edge of map is the Abbott Power Plant which furnishes steam and electricity.

PHYSICS BUILDING (19) — Together with the nearby Nuclear Radiations Laboratory and the Physics Research Laboratory (the Betatron Laboratory, indicated at the extreme right of the map), forms one of the country's great centers for study and research in physics. The Nuclear Laboratory contains a cyclotron for atomic research. The Physics Research Laboratory contains several small betatrons, and here the new 300,000,000-volt betatron is being built to penetrate the secrets of matter.

SMITH MEMORIAL HALL (25) — Bears the name of Captain Thomas J. Smith, a former trustee of the University, who made a generous contribution toward the building. It houses the School of Music. There is a recital hall seating 1100, and a number of studios.

STADIUM (66) — Home of the Fighting Illini football teams. The Stadium is a gift from alumni, students, and friends, in commemoration of Illini who fell in World War I. It was dedicated in 1924, in the famous game when Red Grange made four touchdowns in the first quarter against Michigan. The Stadium seats 70,000 people. The great halls beneath the two main stands are large enough to accommodate several intramural sports.

STOCK JUDGING PAVILION (38) — Provides a show arena 216 by 65 feet, agriculture classrooms, and offices.

TALBOT LABORATORY (40) — Named for one of Illinois' most famous engineers, Arthur Newell Talbot. Houses the Department of Theoretical and Applied Mechanics, and some of the work in Civil and Mechanical Engineering. Much of the research on bridges, roads, and

reinforced concrete is done here. Has a testing machine, three stories high, capable of exerting a force of 3,000,000 pounds, either squeezing or pulling.

TRANSPORTATION BUILDING (16) — Occupied by the Department of Engineering Drawing and other engineering activities. In the corridors is an exhibit of railroad pictures and an outstanding collection of rail sections illustrating the development of railway transportation since pioneer days.

UNIVERSITY CLUB, MEN'S (6) — Meeting place and dining hall for faculty men. Nearby, although not shown on the map, is the Women's University Club.

UNIVERSITY HIGH SCHOOL (13) — The College of Education's model high school in which students, under supervision, receive practical teaching experience.

VEGETABLE CROPS BUILDING (10) — One of the laboratories of the Department of Horticulture. Near Florida Avenue, beyond the President's Home, is another of these, the Horticulture Field Laboratory for the study of fruits and vegetable crops, insecticides and fungicides.

VETERAN'S RECREATION BUILDING (57) — Supplements the facilities of the Illini Union and the dormitories. Has a nursery school for the children of student veterans.

VETERINARY PATHOLOGY LABORATORY (56)

VETERINARY RESEARCH LABORATORY (1) — Temporary quarters for the College of Veterinary Medicine.

VIVARIUM (50) — A center for work in Botany, Zoology, and related biological sciences.

WOMAN'S GYMNASIUM (9) — Headquarters for work in Physical Education for Women.

WOMEN'S RESIDENCE HALL (2) — Housing for 498 women.

WOODSHOP AND FOUNDRY (31) — For classes and laboratories in Engineering and Industrial Education.

Robert Allerton Park is a part of a 5,518-acre estate, a \$1,286,826 gift to the University in 1945. The park is open daily. It is 26 miles from Urbana-Champaign, over Illinois highways 10 and 47 to Monticello where a sign indicates the five-mile township road to the park.
