University of Illinois Foundation

The University of Illinois Foundation, established in 1935, is a non-profit corporation organized under the laws of Illinois. Its chief function is to encourage gifts, from both individuals and corporations, for the purpose of assisting the general educational and research program of the University.

Another function of the foundation is the development of patents assigned to it by the University. The Illini Achievement Fund is a permanent annual-gift program in the interests of the University. It is administered by the Univer-

sity of Illinois Foundation. This fund has set records among the Big Ten schools for the number of gifts to such a fund.

The Foundation has a membership of one hundred persons, most of whom are alumni of the University. The present Board of Directors consists of nine members. In addition to the officers pictured, they are: Joseph Ator, Chicago; Joseph Campbell, Nashville, Illinois; George Donoghue, Chicago; Eugene Funk, Bloomington; Park Livingston, Franklin Park; Lloyd Morey, Urbana; and Leslie Worthington, Chicago.

Amos H. Watts, *vice president*

Clifton DeLong, *treasurer*

The University of Illinois Alumni Association

The official bond between the University and Illini alumni is the Alumni Association. This bond is strengthened by the sending of the *Illinois Alumni News*, which the Association publishes nine times a year. This group assists the officers of the always increasing alumni clubs, helps maintain the Illini center in Chicago's LaSalle Hotel, and performs hundreds of personal services for alumni.

The Association keeps in contact with the alumni and records address changes of almost 90,000 Illini. Some 2,000 address changes are made every month.

Public relations movies are only a part of their activities. The movie concerning the famous playing, marching and singing Illinois football band is only one of their productions to show alumni campus scenes and activities.

In its work to help Illini clubs all over the country, its executives have met with scores of Illini groups, made talks about the campus and its affairs, and have shown football movies and other films.

The "University in the Lake" was established in 1946 by the University of Illinois at Navy Pier in Chicago.

Professional curricula in architecture, architectural engineering, physical education, and a program leading to a Bachelor of Science degree in nursing are offered. Also available are complete pre-professional courses of study in liberal arts and sciences, commerce and business administration, and engineering. Both the basic and advanced courses in ROTC are included for men students.

Students enrolled at the Chicago Undergraduate Division have the same status as students matriculating on the Urbana campus. Priority in completing their work for degrees on the Urbana campus is given the Chicago branch students.

In 1867 when the University of Illinois was chartered, the College of Agriculture was founded.

The College of Agriculture has three major goals: to improve the quality of the products grown in Illinois and the efficiency of their production, to advance the welfare of those engaged in agriculture, and to create a better understanding of the place agriculture holds in our economy.

Technical courses in the fields of agriculture and home economics are offered as a means of achieving the three former goals.

The Experiment Station reinforces the teachings of the College by its testing of new practices. Members of the staff maintain a close contact with the people of the state through its Extension Service.

College of Commerce and Business Administration

Dean Paul M. Green

Four divisions of primary importance are found in the College of Commerce and Business Administration: the Department of Business Organization and Operation, the Department of Economics, the Bureau of Economic and Business Research, and the Business Management Service.

Providing students with a program designed to train them for careers in business, economics, and administration constitutes the main function of the College. This program is also designed to prepare the individual to better play his role as a citizen.

An organized research program is administered by the Bureau of Economic and Business Research. Its findings are published in special monographs as well as two journals — (1) *Illinois Business Review*, a monthly summary of business conditions for Illinois, and (2) *Current Economic Comment*, issued quarterly.

Gregory Hall

College of Education

In the College of Education students receive training for careers in teaching, special educational services, and school administration. Special undergraduate programs are offered in industrial, agricultural, home economics, and elementary curricula.

Students receive actual teaching experience under supervisors in schools cooperating with the College of Education.

Investigations in the field of education for the College are conducted by the Bureau of Research and Service. These investigations are in the form of directing school surveys.

The University High School, which serves as a laboratory for the College, affords opportunities for experimentation under controlled conditions.

Dean B. L. Dodds

Dean W. L. Everitt

Nine different curricula compose the College of Engineering. They are aeronautical, ceramic, chemical, civil, electrical, general, mechanical, and mining and metallurgical engineering; physics; and theoretical and applied mechanics.

Collectively the College, one of the largest in the University, has been and is now continuing the study of many teaching and educational methods.

The College of Engineering has always stressed extra-curricular activities as an important part of education. Several honorary fraternities are organized to recognize and promote scholarship. *The Illinois Technograph*, an engineering magazine published and managed by engineering students, offers a variety of opportunities for engineers.

The student Engineering Council serves to co-ordinate the numerous functions of the member professional societies and sponsors many College-wide activities.

The College of Fine and Applied Arts consists of seven Departments — Architecture, Art, Landscape Architecture, the School of Music, the Bureau of Community Planning, and the University Bands. Sixteen campus structures house the College of Fine and Applied Arts.

Twelve curricula leading to degrees in various fields of the Fine Arts are offered. Besides the College's formal program of instruction it offers many admission-free lectures, concerts, recitals, and a series of art exhibits displayed in the Architecture Building. In cooperation with other campus departments, the College annually sponsors a festival of Contemporary Arts.

Rexford Newcomb, Dean of the College of Fine and Applied Arts, has been on the faculty of the University of Illinois for a third of a century.

Graduate College

Dean Oswald Tippo

Graduate instruction at the University of Illinois began in 1902. In 1906 a Graduate School with a separate faculty and administration was organized.

David Kinley, who later became President of the University of Illinois, was the first Graduate Dean. The words of Mr. Kinley express the essential aim of the Graduate College, "The development of the power of independent work and the promotion of the spirit of research."

Since its founding the College has grown steadily, but most rapidly after World War II. Scholarships and fellowships established by the University Board of Trustees are contributing to this growth.

Many students in the Graduate College hold positions as instructors in undergraduate divisions of their specialized courses.

School of Journalism and Communications

Fifty years ago the School of Journalism was first introduced to the University of Illinois under the sponsorship of Thomas Arkle Clark, a member of the English Department. In 1950, the name of the School was changed to School of Journalism and Communications to describe more accurately its present functions.

Instruction in the School of Journalism and Communications consists of a journalism division, including news editorial work and publication management, an advertising division, and a radio division. The School also attempts to provide services for the Communications industry in the state.

The journalism and communications program is based on the conviction that the student can profit best from a course of study that permits him to integrate professional subjects with general subjects.

Director Frederick Siebert

Dean Albert Harno

The primary purpose of the College of Law is to train men and women for the practice of law. In a broader context, the College aims to provide a part of the educational foundation for men and women who will become leaders in community service and directors of public thought.

Since its founding in 1897, the College of Law has pioneered for the improvement of legal education and for higher standards of admission to the United States Bar.

Two national accrediting agencies for law school, the Association of American Law Schools and the Section of Law Education of the American Bar Association, have been organized since the establishment of the College. From the first, the College has been on the approved lists of these agencies.

The College of Liberal Arts and Sciences is the largest and most complex division of the University. This complexity is due to the fact that the College serves a great many purposes.

The General Curriculum of the College leads to the degrees of Bachelor of Arts or Bachelor of Science depending upon the field of concentration and emphasis of study.

In cooperation with the College of Medicine, the College offers a professional course in occupational therapy leading to a degree in the College of Medicine.

The College also functions as a service unit for other colleges offering fixed curricula in pre-professional training for nursing, medicine, dentistry, veterinary medicine, law, and journalism. This training includes such work in English, foreign languages, science, and social science as constitutes established all-University or special College requirements.

The Library

Library School

Robert B. Downs

The oldest library school west of the Alleghenies is the University of Illinois Library School. Established in 1893, this school was located at the Armour Institute of Technology in Chicago until the summer of 1897 when it was moved to the Urbana Campus.

The purpose of the Library School is to prepare administrators and assistants for service in public libraries; in libraries of schools, colleges, and universities; and for specialized libraries.

Fully accredited by the American Library Association, the Library School is rated as one of the leading schools in the field.

The undergraduate Library Science courses are offered as a minor in the College of Liberal Arts and Science, and the College of Education. The fifth year's work for the M.S. and L.S. Degree is the minimum academic preparation for professional librarianship.

Huff Gym

School of Physical Education

The School of Physical Education serves two major functions. First, it provides professional training in five lines of service: physical education for both men and women, health education for both men and women, recreation for both men and women, and dance for women.

Second, the School conducts a service program in physical education for all University students who, by University regulation, are required to secure four semesters credit in this subject.

The School is outstanding for its program of fundamental research in the fields of motor and organic fitness and diagnostic fitness tests for both faculty and students.

Since 1937, Seward Staley, a graduate of Springfield College, has served as director of the School of Physical Education.

Director Seward Staley

Acting Director Frank Bridgewater

The Division of Special Services for War Veterans was formed to give the greatest possible help to veterans who wish to enroll in the University of Illinois.

Veterans are offered an opportunity to reorient themselves academically through refresher work, reduced programs, and selection of courses. The Division directs the educational programs of veterans whose special needs are not met by existing curricula, and can certify such students for the Bachelor of Science degree.

In addition, the Division studies the needs of returning veterans and informs the veterans of all the many services of the University.

The Armory

The Division of University Extension is the agency responsible for "extending" the educational resources of the University to persons not enrolled for study in residence.

Like the Graduate College, the Division's faculty is drawn from the faculties of the other colleges and schools; and it is composed of those members of the teaching departments who give such instruction, together with a small administrative staff.

About one hundred seven college-level correspondence courses are offered toward earning a degree.

The Division also attends to the Film Library of the University. High schools all over the state, as well as other Universities, rent instructional films and old movies from the Extension.

Veterinary Medicine Building

College of Veterinary Medicine

Dean Robert Graham

In 1944 the College of Veterinary Medicine was established, and in 1948 a professional four-year course in veterinary medicine leading to a D.V.M. degree was activated.

The College trains veterinarians in the control and prevention of animal diseases in order to protect the livestock industry and to safeguard public health from animal diseases transmissible to man.

Other work of the College includes programs of veterinary research, extension, and graduate study. A disease diagnostic service and a veterinary clinic and hospital service provide animal patients and specimens for instructional purposes.

Dr. Robert Graham was appointed as the first dean of the College of Veterinary Medicine in 1945.
